Profitable Observations and Notes.

ALL Measures of Longitude are deduced from Earle's Corns: Three Barley Corns make an Inch, Twelve Inches one Foot, Three Feet one Yard, Five Yards and an half one Statute-Pole, or Perch; Four Perches make a Furlong, Eight Furlongs make an English Mile, in a Mile are: Three hundred and twenty Perches or Poles, One thousand Sixty six Paces: Ells, One thousand four hundred and Eight: Yards, One thousand seven hundred and sixty: Feet, Five thousand two hundred and Eighty: Inches Sixty three thousand three hundred and sixty; and Barley Corns, 190000 and 80. The Circumference of the Earth and Sea jointly is 25036 Miles, and the Diameter 7966 Miles, and its Semidiameter 3983 Miles, according to English Mensuration.

The Dimensions of England, &c.

THe Length of England from South to North is 386 Miles, the broadest place from the Lands end of Sandwich is 279 Miles; the next broadest place, which is between St. Davids and Yarmouth in the East, is 240 Miles; the whole compass of England is 1532 Miles. The length of Ireland, North and South, is 303 Miles; the greatest breadth thereof, East and West, is 112 Miles; the whole compass of the main Land is 948 Miles. The greatest length of Scotland, South and North, is 480 Miles; and the breadth East and West is 165 Miles; the whole compass 1100 Miles. The Isle of Man is in length 28 Miles, the breadth 18 Miles, and in compass 91 Miles. The Isle of Anglesey is in length 21 Miles, in breadth 18 Miles, in compass 85 Miles. The Isle of Wight is in length 22 Miles, in breadth 13 Miles, in compass 57 miles. The Isle of Garnsey is in length 11 Miles, in breadth 9 Miles, the whole circumference is 20 Miles. The Isle of Jersey is in length 10 Miles, in breadth 6 miles, in compass 28 miles.

ADVERTISEMENT.

THe true Spirits of Scurvey-Grass both Plain & Golden are still faithfully prepared as formerly by Mrs. Hooker Executrix of Mr. Robert Bateman, & sold by her at her House in Pauls Church-yard near Doctors Commons London, & most eminent Towns in the Country, the Bottles are sealed with the half Moon and Beams, price 1 s. the Bottle.

A Geographical Description of the World,
containing Europe, Asia, Africa and America.

Europe contains in it these Provinces, Germany, Swedeland, Denmark, Italy, Muscovia, Hungaria, France, Spain, Polonia, Sclavonia, Norway, Grecia. The most eminent Islands are these, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corfica. The greatest length of this part of the World is 3000 Miles, the breadth 900.

Asia, the biggest of the four, and first known part of the World, contains these principal Regions and Islands, viz. Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India, Parthia, Media, Palestine, Caldea, Tartaria.

In *Africa* are these Provinces viz. Ægypt; Barbary, Æthiopia, Nubia, Abassines, Aloncomotopa, Lybia. The Islands Magdagarde, St. Thomas, Insula de Cape Verde, Insula de Canaria, Insula de Madera.

America, the fourth part of the World, and of the latest discovery, consisteth of these two parts, Mexicana and Peruana. The Provinces of Mexicana are Nova Hispania, Terra Florida, Nova Albania, California, Norimbega, Nova Francia, Estotiland. The chief Islands of Mexicana are Greenland, Heland and Friesland. The Provinces of Peruana are Brasil, Pisal de Chibana, Peru de Cartanen, Chila, Charon, Chico; Patagores. The chief Islands of Peruana are Hispaniola, Cuba, Jamaica. and many others.

The Use of this Table is this: If thou wouldst know what the Interest of 100 and 5 l. is for 9 Months at 6 per Cent., then in the first Column find out 100 at the Root of the Column, and right against it under the Title 9 Months, (which is the fifth Column) here you shall find 4 l. 10 s. And against the Number 5 l. you shall find 4 s. 6 d. So that the Interest of 100 and 5 l. for 9 Months cometh to 4 l. 14 s. 6 d. The same of all the rest.

This month sow Hemp and Flax, pole Hops, set and sow all kinds of Garden Herbs. Restore the liberty of the laborious Bee by opening her Hive. Bark Trees for Tanners; and let good Housewives mind their Gardens, and begin to think of their Dairies.

In Gard'ning never this Rule forget, To sow dry, and set wet. (get,

The use of Physick becomes now seasonable, as also Purging and Blood-letting. It is good to abstain from Wine, for many diseases will be taken thereby to the ruine of many.

This month the Pores of the Body are open, and apt to receive Physick; therefore this is the best time to remove and prevent causes of sickness, or for speedy remedy in extremity, pray to God for a blessing.

This month commands the provident Housewife, and the prudent Artist, to set their Stills on work. In the beginning of the Month sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop Gardens, cut off superfluous Branches. Moss-Trees and Gardens, and weed Corn; rise early, walk the Fields and Gardens.

Now every Garden and Hedge affords thee Food and Physick. Rise early, walk the Fields by running streams, the North and West sides. Sage and Sweet Butter, an excellent break-fast. Clarified Whay with Sage. Scurvey Grass Ale, and Worm-wood Beer, are wholesome Drinks. Green Whay excellent against Choler. Eat and drink betimes in the morning. Abstain from Meats that are hot in Nature, and false in Quality.

At the Full of the Moon this month and next, gather your herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish three or four days after the Full, and they will not run to seed. Shear your Sheep, the Moon increasing. Take heed of cutting Herbs or Flowers with knife, but rather gather them with your fingers.

Let honest moderate Labour and Exercise procure your Sweat. Use thin and light Diet, and chaste thoughts tend to health. Lie not unadvisely on the ground, or over hastily drink.

Distilling of Roses, and making of Syrups and Conserve are now in prime: Use a light and thin Diet, for the Stomach is weaker now than in the former months: Clarified Whay boiled with cold Herbs, are very wholsom.

Get Rue, Wormwood, and Gall, to strew on your Floors, to destroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the shade, than in the Sun, which too much exaleth their vertue; but to avoid corruption, let the Suns heat a little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this Month, and produce pestilential diseases: Forbear superfluous drinking, but eat heartily; use cold herbs and meats, abstain from Physick. Now the Rivers are more wholesome than the Baths. In time of Pestilence keep your Chamber windows shut till the Sun have force of shining. Perfume your Chamber every morning with Tar, upon a Chafing-dish of Coals. Use *Carduus Benedictus* boiled, and drink fasting.

Sow Wheat and Rye, remove young Plants and Trees about the New Moon, observing this as a seasonable secret, that in setting, you carefully place that side to the South and West which were so before you took up the Plant; otherwise the cold kills it. Gather your remaining Winter Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last month hung on your backs in jest, now butto them close in good earnest. Cloath you now for prevention, for the cold comes insensibly, and Fogs of times beget a whole Winters cold. Consult with your Taylors, as well as Physitians.

Advertisement concerning Pilulæ Londinenses, or the London-Pills.

WHereas several Persons, never educated Physicians, have abused the World with dangerous Physick; a Physician of many years standing in the College of Physicians in London, has for the common benefit made publick a Pill, which cures the Diseases that are incident to human Bodies, and preserves the Body in health. These Pills are sold at the Authors house (where you may have his advice about any Disease) in Winchester-street in London.

The best Physick this month is
good exercise, warm and whole-
some meat and drink; but if any
distemper afflict the body, finish
your Physick this month, and so
rest till *March*, unless necessity
urge: use good meat, and whole-
some drinks to nourish the blood:
be sure to go dry of your feet; for
if not, (unless it be those always
used to it) be certain to be trou-
bled with Rheums, and cold, and
other inconvenience, attending.

In the last quarter of the Moon this month and the next, are the best times to fell Timber: Let Fowlers mind their Game. Cover all your best Flowers and Herbs from cold and storms, with rotten Horfe-dung. Look well to thy Cattle, blood Horses. Let a warm fire, and a cup of Nectar be thy Bath, the Kitchen thy Apothecaries Shop, hot Meats and Broths thy Physick, and a well-spread Table the proof of thy charity to thy poor Neighbors.

BUCKWORTH'S LOZENGES, famous for the cure of Coughs, Colds, Catarrhs, Hoarseness, &c. being also a great Cordial, and a Sovereign Preservative against all Contagious Distempers, Malignant Airs, and Unwholsom Weather. Well approved of by the chief Physicians of the Colledge, to whom the true Receipt has been communicated by the Publisher hereof, and are now more faithfully prepared than ever since the Authors death, and sold also by James Shipton Apothecary at the Crown in Hatton-Garden.

A Description of the four Quarters of the YEAR.

THe Spring Quarter begins this year upon Thursday March 10, near 10 in the morning, at which time the Sun enters the Equinoctial Sign Aries, causing an equality of day and night all the habitable World over. Summer takes beginning upon Saturday June 11. near Noon, the Sun then approaches our Zenith, and enters the first Scruple of the Tropical Sign Cancer, making longest days with us, and shortest nights. Autumn or Harvest-quarter begins when the Sun touches the first Scruple of the Equinoctial Sign Libra, which this year will be upon Tuesday Sept. 13. near one in the morning, again equalizing both day and night. Winter begins on Saturday Dec. 11. about two in the afternoon, the Sun then touches the first point of the Tropical Sign Capricorn, making the shortest day and longest night in the year with us on this side the Equator, as also the longest day and shortest night to the people who inhabit the Southern part of the world.

Of the Eclipses this present Year 1687.

THere will be only two Eclipses of the Sun this year, and none of the Moon: The first of the Sun will be visible to us, and may be seen upon May-day near one in the afternoon, the total duration one hour seven minutes, and not above one Digit eclipsed, and therefore no great Eclipse, as Argol reports. The second falls on Octob. 26. about six in the morning, but not visible to us, it being ended before the rising of the Sun in our Horizon.
